They introduced with various people in our society who under the belt of WHITE COLLAR are curse to society as well as those who are boon to our society. A lot of information was provided by the three of them in this session.

Then came the Aptitude Session which was a mere surprise to all of them as this time it was Python that students learned from the Aptitude Developers Amol Shelke and Vrushali Shelar. Right from the basics of the programming to executing it was successfully carried by both of them in a very systematic manner. The session was very well appreciated by the students.

Then the CSD's took a game which again was a mere surprise for all of them. As this time they provided the topic that ELECTROVERT organization was to be provided to Private Company rather than ELESa and the other one was to renovate the lab of Electronics department in our college. The teams had to submit their budgets and this time it was not discussion or debate but a presentation type which is carried out in a court where President Shubham Mhatre was the judge. Students participated enthusiastically.
